What is the holding time? That may be very difficult to get in place by May 1.

Berkley we need approval for EPA N15 isotope method. It has never been under an EPA contract.

Did you mean to include Berkley, too, in the original email?

Have we used this lab through the contract before?

I assume that you would be using it through the contract with ERG, right?

Can you send Daisy and I the name(s) of the lab(s) for Central Sands analysis?

With the May 1 contract option switch over, she wants to make sure that everything is set for that lab.
